To: [REDACTED] Kosta Gus Makreas [REDACTED]

Hi Kosta,

I hope you've been well. I visited the ETLet's talk site and looks like you've been busy!

I have been busy too :) I have had some huge breakthroughs with our mathematics—downloads over the course of my life, and because of this we derived a unified equation. This means we have the foundation for clean tech on lock.

It's all open source and I reached out to Greer this morning through official channels (he is one of many I'm reaching out to,) and I cc'd you as well as Nanette and my friend Dr. Muriel Rabone on the message. I'm just getting official time stamps so this truly remains open source for everyone.

Hopefully I used the correct email. In any case, I wanted to reach out and touch base so you weren't caught left field.

Let's connect soon if you've got time to spare and are feeling it :)

Lots of love to you and Hollis!

Warmly,
Meniyka
